

Jakarta, 26 September 2006

**To whom it may concern.**

Following the maturity of our organization and people's readiness, we realized it was the time to start the Six Sigma development to prepare the organization for future challenges, therefore in mid 2005 we had decided to initiate the Six Sigma program. Though we have our own internal resources at Group and Division level to champion this course, however, in considering language advantage and cultural factor, we have decided to engage Mr. Sharil Goh Fadhil from Lean Applied Technologies, to assist us achieving this goal.

Since May 2005, 13 Six Sigma candidates were chosen and trained under the guidance of Mr. Sharil Goh Fadhil starting with Basic Statistic and Minitab 14 and followed with actual Six Sigma and each with project.

Mr. Sharil Goh Fadhil has not only the in depth knowledge of Minitab 14, statistic and Six Sigma methodology, his leadership, coaching ability, commitment and passion to excel has lead the candidates to an outstanding achievement. He has demonstrated the expertise and professionalism to coach and inspire the team.

We appreciate his real time support to the candidates and thank him for the excellent contribution to our success and he will remain with us for any future Six Sigma activities.
